

Bandsaws

A range of 3 heavy duty machines produced from aluminium alloy with non-stick interiors. The ideal solution for cutting frozen or fresh produce.

OMT210

All castings are produced from aluminium alloy heavily anodised with a non-stick coating on all internal surfaces for easy cleaning. Safety switch fitted - saw can only be used when all panels are closed. Water tight electrical equipment. Blade tightener with pre-tensioned spring. By rotating the appropriate lever, the blade is adjusted to the right tension. Pulleys and wipers quickly removed without the need for tools. Antiwear blade-guide and removable product carrier. All holes and crevices where food and sawdust could collect have been eliminated. The ideal solution for cutting frozen or fresh produce from cutlets, poultry, fish, to liver, salami or even parmesan.

Sawdust drawer - optional extra

OM-A Stainless steel blade with shaped tooth for smooth cutting without residue, ideal for cutlets

OM-B Rimmed blade to cut items with tender bones such as poultry, fish, etc. It cuts gently and fast, free from scraps and bone residue

OM-C For the straight cutting of meat without bones, eg, liver and salami

OM-D Blade with hardened tooth for cutting frozen meat or fish, also excellent for Parmesan cheese

OM-E Hardened steel

OMS250

Sawdust drawer - optional extra
